

Did you know that Data Center services are available in the community?

Data Center services include:

- Data collection
 - Surveys and questionnaires
 - Focus groups
 - Key opinion leader surveys
 - Community forums
- Data analysis
- Identification of data sources
- GIS mapping
- Literature review and white papers
- Community needs assessments
- Health risk assessments (for employers)
- Presentations of data
- Program, project and grant evaluation and research
- Health impact assessments (built environment, transportation, policy)
- Prioritization processes/ decision making
- Facilitations/group process

Data Center staff also provide:

Consultation on:

- Program planning and development
- Management of health and community-based data sets
- Human subjects policies and procedures
- Organizational performance management
 - Performance measurement and systems for data-driven decision making
 - Quality improvement - methods, tools and projects

Training on:

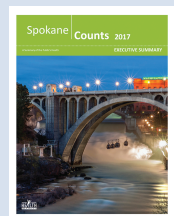

- Assessment processes
- Quality improvement methods and tools
- Performance measurement
- Communicating with data
- Logic models and program evaluation

Provision of Data Center services is dependent upon staff availability and may be subject to a fee, per fee schedule approved by Spokane Regional Health District's Board of Health. Call (509) 324-1698 or contact a staff member directly for details and to discuss needs.

These recent Data Center documents are available on the SRHD web site:

srhd.org/data-and-reports

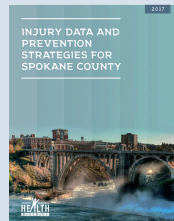

Spokane Counts 2017 provides information about selected public health indicators that can be impacted by public health and community partners.

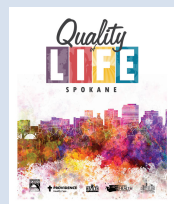

Confronting Violence Examines factors that contribute to, or protect people from, violence in community; offers something everyone can do toward prevention.

Injury Data and Prevention Presents data, trends, and a framework for identifying injury prevention opportunities in Spokane County.

Quality of Life A holistic look at the health and well-being, comfort, and the overall lived experience of individuals locally—indicates marked disparities between different groups.
